**COMMENTS ON RESULTS**

Operating profit before impairment for the year ended 30 June 2020 reached Rs 13,012 million representing an increase of 11.6% compared to last year. Net interest income rose by 9.9% to reach Rs 13,464 million representing nearly 70.0% of the Bank's Operating income. There was also a strong recovery from earlier losses in fair value gains in equity investments over the last quarter with the turnaround in the US stock markets. In addition, Fair value gains from other Financial Instruments improved and helped boost the non-fee based 'Other income' by 25.3% to reach Rs 2,464 million when compared to last year. Operating expenses increased moderately by 5.6% resulting in a drop of our cost to income ratio by more than one percentage point, to a new low of 32.5%.

Despite the above, Profit after tax dropped by Rs 1,357 million (15.5%) to reach Rs 7,409 million compared to last year. Net impairment of financial assets increased significantly from Rs 829 million over the first semester to Rs 3,989 million during the second semester compared to Rs 735 million and Rs 721 million respectively during the corresponding semesters last year. Expected credit losses ('ECL') on the performing assets portfolio amounted to Rs 3,290 million out of the total net impairment figure of Rs 4,818 million.

This significant increase in ECL reflects the inherent increase in credit risks and our forward looking view of the impact of the Covid-19 pandemic on our operations, based on certain assumptions made in our credit modelling exercise amidst significant and persistent uncertainties on how future developments will unfold not only locally but also in our major markets.

Loans and Advances to Customers rose by 6.3% to reach Rs 226.8 billion whilst Total Deposits from Customers rose by 18.6% to reach Rs 364.0 billion. These trends comforted the Bank's liquidity position notably in foreign currencies. The Bank's foreign currency loans represent 64% of the funding base while its US dollar Liquidity Coverage Ratio stood at 190% as at 30 June 2020 which is well above the Basel III regulatory norm.

Shareholder's equity went up by 10.5% to reach Rs 53.2 billion as at 30 June 2020 and the Bank's BIS ratio and Tier 1 ratio at 17.5% and 16.5% respectively, remained at comfortable levels.

**OUTLOOK**

The operating context remains particularly challenging, with little visibility on the evolution of the situation going forward. Difficult market and economic conditions are likely to take their toll on customer segments across markets, albeit to varying degrees. Whilst some business segments, notably on the international front, are expected to be resilient, our operating results are likely to be down in view of restrained business activities amidst the economic slump and dampened investor confidence as well as squeezed margins.

Pressures on asset quality are likely to intensify with the degree of the impact remaining highly dependent on the duration and severity of the COVID-19 pandemic and the effectiveness of the support measures from the authorities, including financial assistance from the Mauritius Investment Corporation to economic operators.

Against this backdrop, the Bank will maintain its market vigilance and monitor the situation closely with regular assessment of potential scenarios. The Bank will maintain adequate buffers in terms of capital adequacy as well as funding and liquidity ratios, thus preserving its financial soundness. Concurrently, while reviewing our short-term priorities, the Bank will continue to invest for the future and create the necessary conditions to underpin a rapid rebound when economic conditions start to heal. As prescribed by the Regulator, the Bank has not declared a dividend for the year.

These financial statements were approved for issue by the Board of Directors on the 25 September 2020.
