OVERALL PERFORMANCE AND OUTLOOK

The bank delivered a robust financial performance with strong Operating profit growth and a lower Net impairment of financial assets. This resulted in a Profit after tax of Rs10.1 billion for the nine months ended 31 March 2023, a growth of 50.5%, compared to the same period last year.

Operating income increased by 29.3% to reach Rs20.4 billion, with a strong growth of 30.2% in Net interest income driven by improved foreign currency margins and an increase in volume of loans and advances, from our Trade Finance and Global and International activities.

Net fee and commission income and Other Income also showed good progress, driven by foreign exchange commercial and trading activities, Trade Finance and Payment activities.

Non-interest expense rose by 20.9% due to our continuous investment in people and technology to reach Rs6.7 billion while improving our cost to income ratio to 32.9%.

Operating profit before impairment reached Rs13.7 billion, representing an increase of 33.8% over the same period last year. Net impairment of financial assets for the nine months ended 31 March 2023 was lower at Rs2.4 billion compared to Rs2.8 billion for the same period last year due to higher recoveries with a Non Performing Loans ratio of 3.3% and an annualised cost of risk of 0.80%.

Shareholders' equity increased by 10.8% to reach Rs75.0 billion and the return on average equity improved to 18.9% for the nine months ended 31 March 2023.

On 31 March 2023, the bank successfully closed a Basel III compliant Tier 2 capital instrument of USD147.0 million with African Development Bank Group to further sustain its capital and funding requirements in order to cater for its international business expansion. This, coupled with the robust results, resulted in stronger Capital adequacy and Tier 1 ratios of 19.2% and 16.6% respectively.

The global economy is showing signs of improvement with the drop in inflation rates in the US, the increased growth rates in China following its re-opening and stable energy prices. However, there are still a number of uncertainties, with the impact of tightening monetary policies on growth trajectories, rising interest rates on mid-sized US banks, and increased geopolitical tensions. Regionally, high inflation levels and interest rates are having a negative impact on Foreign Currency and debt levels in many sub-Saharan African economies. On the local front, the strong recovery of the Tourism sector and good performance in the ICT and Financial services sectors will help support economic growth amidst the high interest rate environment.

The bank will continue to pursue its strategic objectives, focusing on its international diversification strategy within niche areas of expertise whilst remaining a key player in the development of Mauritius and beyond. On 19 April 2023 the bank successfully closed its inaugural USD300.0 million senior unsecured bond on the London Stock Exchange, a landmark transaction by a Mauritian entity on the international debt and capital market.

Statement of profit or loss

Net interest income

Net interest income for the period reached Rs13.4 billion, an increase of 30.2% compared to the same period last year with a growth of 13.2% in average interest earning assets, driven mostly by increase in Trade Finance and Global and International activities and improved foreign currency margins despite a higher cost of funding. On the local front, margins dropped slightly with the successive hikes in the Key Rate and nearly half of our excess liquidity being in fixed rate GOM/BOM instruments.

Non-interest income

Net fee and commission income grew by 13.0% to reach Rs4.2 billion boosted by higher revenues from cross-border trade financing & guarantees as well as payment activities, with an increasing shift to digital payments locally impacting positively on cards income. Other Income increased from Rs1.8 billion to Rs2.8 billion with the positive performance in profits generated from foreign exchange transactions, higher gain in the fair value of foreign equity instruments partially offset by a fall in Mark-to-Market gains from fixed income trading activities.

Non-interest expense

Non-interest expense increased by 20.9% to reach Rs6.7 billion driven mostly by staff related expenses. This is in line with additional recruitments in specialist areas within the bank in order to support our strategic initiatives and higher salary compensation for cost of living. The bank also invested further to strengthen its technological capabilities and also higher professional fees on account of its funding initiatives. With operating income growing at a higher pace than non-interest expense, Cost to income ratio dropped to 32.9%, from 35.1% for the same period last year.

Impairment

Net impairment of financial assets for the nine months ended 31 March 2023 was lower at Rs2.4 billion compared to Rs2.8 billion for the same period last year due to higher recoveries with a Non Performing Loans ratio of 3.3% and an annualised cost of risk of 0.80%.

Share of profit of associates

The Share of profit of associates increased to Rs0.5 billion with a higher contribution from SG Mozambique.

Profit for the period

Profit for the period rose by 50.5% to Rs10.1 billion as the higher Operating income and lower Net impairment of financial assets largely offset the increase in non-interest expense.

Statement of financial position

Total assets

Total assets grew from Rs658.2 billion to Rs745.5 billion between 31 March 2022 and 31 March 2023 representing a growth of 13.3%. This was generated largely by a growth in Loans and advances to customers and Investment securities with the deployment of the excess liquidity, mostly in the 7-day BOM instruments.

Loans and advances

Loans and advances to customers grew by 6.9% to reach Rs317.4 billion compared to the same period last year largely on account of its short-term Energy & Commodities, Global and International business activities.

Funding and liquidity

Total deposits from banks and customers increased by 12.9% to reach Rs560.3 billion as at 31 March 2023 with a significant inflow of short term deposits as from the second quarter while 'Other borrowed funds', including interbank borrowings, repo transactions and syndicated facilities stood at Rs89.8 billion. This resulted in a drop in our loans to deposits ratio to 62.5% while the total loans to funding base ratio, including borrowings and subordinated liabilities, went down to 53.3%. The bank remained well funded and highly liquid with a liquidity coverage ratio standing at 516.0% as at 31 March 2023.

Capital position

Shareholders' equity grew by 10.8% to reach Rs75.0 billion supported by the rise in retained earnings net of a dividend pay-out of Rs2.0 billion in September 2022. Following the issuance of Tier 2 capital instrument of USD147.0 million with African Development Bank Group, our capital adequacy and Tier 1 ratios were further boosted to 19.2% and 16.6% respectively.

Income and expenditure evolution

Credit impairment charges* & credit quality

* Relate to loans & advances (including corporate notes)

Note: impairment charges for Mar 23 relate to nine months while the ratio has been annualised
