

Uplift your connectivity with
MCB SWIFT Service Bureau

Sharing our capabilities and proven frontline experience

Certified by SWIFT, MCB SWIFT Service Bureau offers SWIFT Connectivity to banks and financial institutions in a secure, cost-effective and reliable manner, whilst no onsite SWIFT equipment and specialised technical qualifications are required for the users.

With more than 20 years dealing with SWIFT-related products and services, MCB SWIFT Service Bureau capitalises on its knowledge and skills to provide a comprehensive solution to its customers.

Our tailored solutions to meet your needs

MCB SWIFT Service Bureau (SB) provides access to the SWIFT network through the SWIFT Alliance Web Platform, which is a full-fledged interface. This platform enables client banks to send and receive SWIFT messages in SWIFT's complete portfolio of message types while the bank preserves its own SWIFT identity and has full responsibility for their messages.

The MCB SWIFT Service Bureau will handle highly sensitive administrative tasks such as user management, system upgrades and maintenance and will order all relevant SWIFT services and products on behalf of the SWIFT user.

The SB will also provide an archiving service which can be accessed directly by the client for a period not exceeding two years. Beyond that period, the request will be handled by the Service Bureau personnel for messages up to a maximum of seven years old.

We also offer SWIFT documentation and assistance through a Help Desk and a hotline is available for urgent queries and support.

Moreover, training is tailored to the needs of the end users and will be provided upon request at an agreed fee.

Extra Services

- Cutting-edge anti-money laundering solutions to monitor and block suspicious messages
- Duplicate detection solution to stop possible duplicate transactions
- Online query of archived SWIFT messages

How does it work?

Your bank

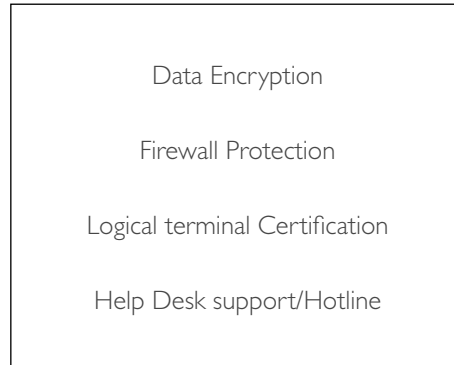

MCB SWIFT Service Bureau

SWIFT network

Business A
(e.g. Trade Finance)

Secure link
via https

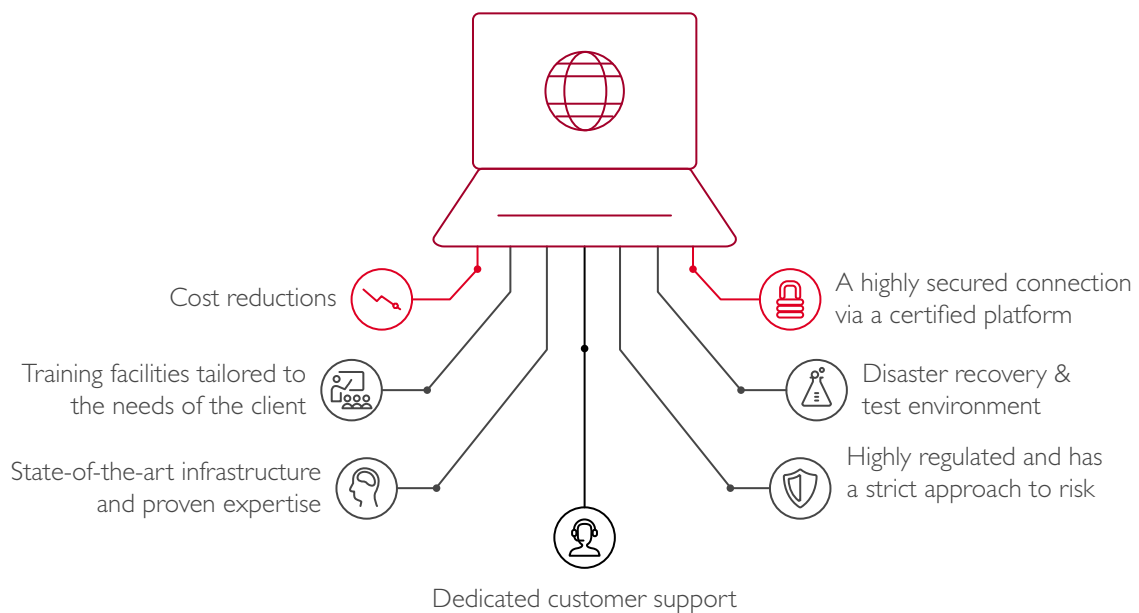

Business B
(e.g. In-branch requests)

Minimum requirements:

- Internet connection: Minimum ADSL on Windows PC/Laptop
- Internet Browser Settings: Internet Explorer 11 and above

Why share a SWIFT Connectivity with MCB?

We come from the same banking environment

Save on your investment and make the most of MCB's expertise
