

AVA chairs - Designed by Song Wen Zhong

The **Ava chair** was inspired by the idea of mythical dragons and the design of Ming dynasty armchairs.

It is a high-tech object, created using the modern technique of polycarbonate injection.

It is manufactured by injection of Re-life polypropylene made of recycled industrial waste. Light and stackable, it is available in several opaque matte shades. It was designed by **Song Wen Zhong**, a young Chinese designer who won the Roche Bobois Design Award based on the theme of "Nature, universal link between East and West".
